Hey Joshua,

Yes, I am in the process of gathering the water data.

Question. I don't have/use any official letterhead. What exactly constitutes is needed for official letterhead?

Jason Lawrence

Hi Jason,

Are you going to be able to respond to the Order, as detailed in the previous email, on company letterhead and signed accordingly?

Thank you

Importance: High

Hi Jason,

I wanted to confirm that you received my previous email requiring the response to be generated on company letterhead and contain the other details.

Let me know if you have any questions.

Thank you,

Josh

Hi Jason,

Thank you for responding, however, please generate a response on company letterhead. Also, please include the certifying statement included on page 3 of the Order. The letter can be made into a pdf and emailed to me if you like.

Let me know if you have any additional questions.

Hey Joshua,

The Pacific Palms lease does not have any sumps or evaporation ponds of any sort at all. Simply put we produce total fluid into 1 large above ground steel tank 24/7. Water naturally drops to the bottom of the tank from the oil. This tank is additionally heated simultaneously as the heat helps separate water from oil. The heated produced water is drained off the bottom with a small pump into another large above ground steel settling tank then gravity feeds through two (2) 3 part above ground steel clarifying systems. So the water is basically allowed to settle and separate 8 times before it is discharged into the sewer system. The produced fluid is also treated daily as it is produced with an emulsion breaking chemical that's whole purpose is to separate water from oil. The water that is discharged into the sewer virtually looks like drinking water.

If this letter satisfies does or does not satisfy your requirements please let me know so I can accommodate the requirements.

Thank You

Jason Lawrence

Hi Jason,

I have attached a copy of the original investigative Order sent to Dr. Wakim back in December. Please provide a written response on company letterhead as soon as possible or I will be sending a Notice of Violation. The Order is inquiring as to if Pacific Palms currently operates any sumps, ponds, or pits that may hold fluids associated with oil and gas production. Historical information on these features is also requested if available. If no sumps, ponds, or pits exist within your operations, please provide specific details how produced water is managed and disposed of, including annual volumes discharged. A pdf copy of the letter emailed to myself is an acceptable response.

Let me know if you have any questions.

Thank you,

Josh Cwikla
